Documentation tool for dotty using Tasty files

Bryan Abate

May 3, 2019

Abstract

Current documentation tool (dottydoc) relies on compiler internals. The tool introduced here aims to build a program not dependant on compiler internals but instead use Tasty files which are output when a Scala program is compiled.

Chapter 1

Introduction

Chapter 2

Goal

Chapter 3

Output format

Chapter 4

Architecture

Chapter 5

Problems encountered

Chapter 6

Conclusion
